

KINETIC DATA

Your business. Your process.

Fulfillment

Kinetic Fulfillment is the next evolution in Kinetic Request delivery. Flexible and easy to use, it allows for the creation of targeted workflow processes to meet your unique needs.

Problem

Current fulfillment systems are rigid and cumbersome to complete. What's more, their generic nature prevents further automation after any manual fulfillment.

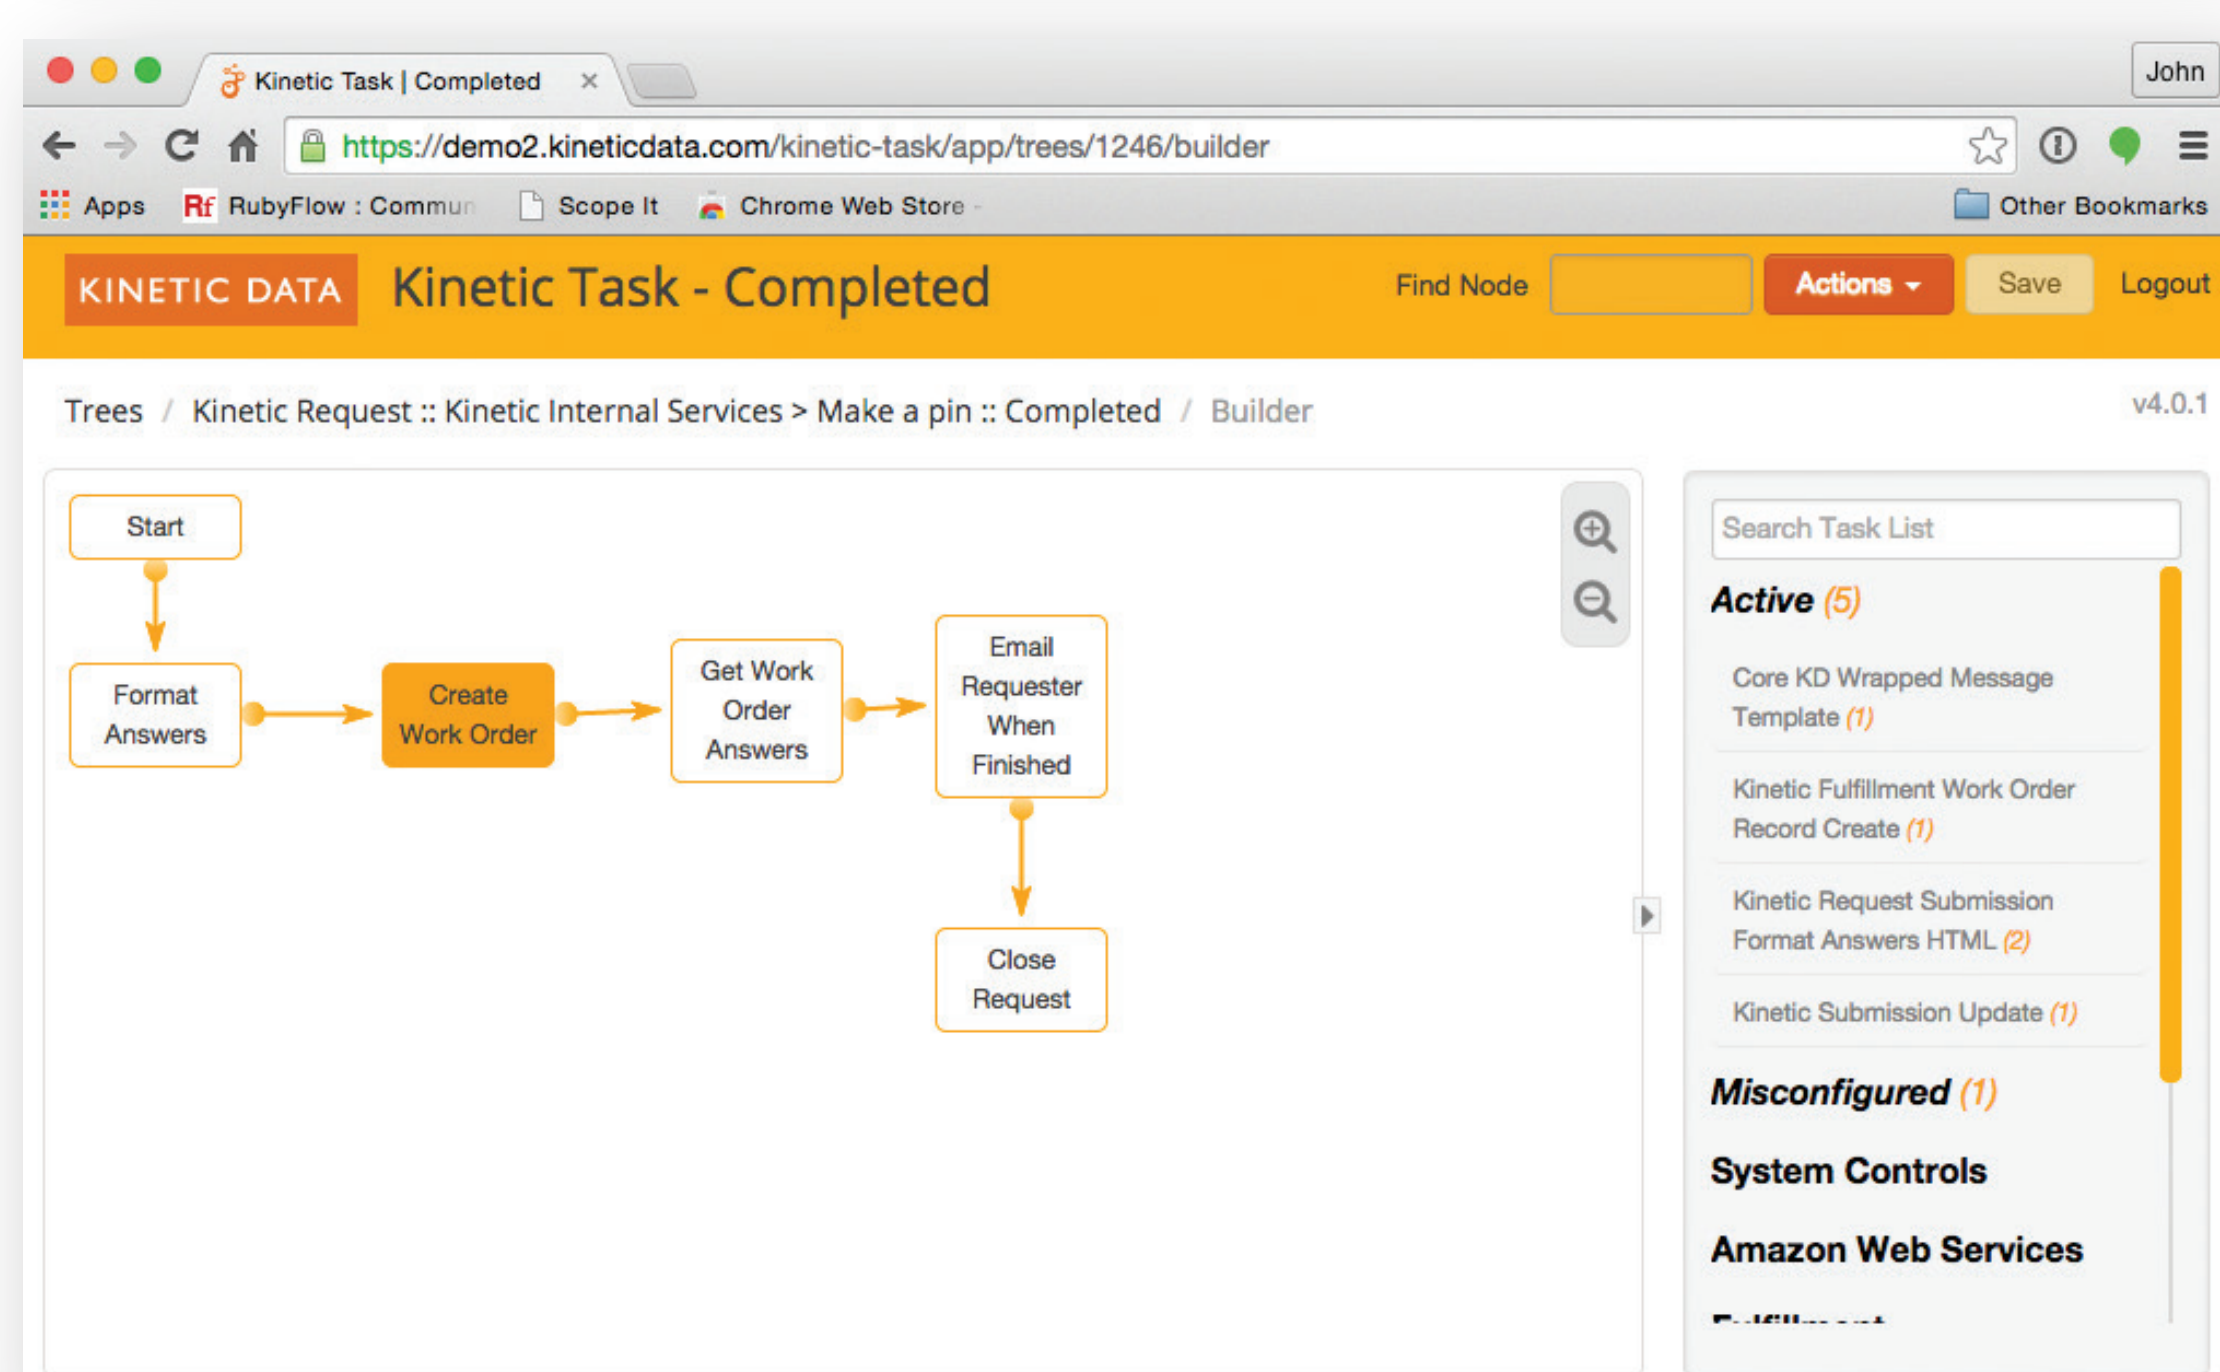

Action

Use Kinetic Fulfillment to populate specific screens for the task in an optimized user experience.

Result

The new streamlined, efficient system is optimized for both web and mobile user experience.
