# Request CE Hubs

BridgeHub:

Problem

Pulling data from disparate systems is time consuming and complicated.

Action

Use BridgeHub to easily add and configure bridges, pulling from multiple sources with one simple install.

Result

Rich, dynamic data is used more often, leading to fewer errors and greater efficiency.

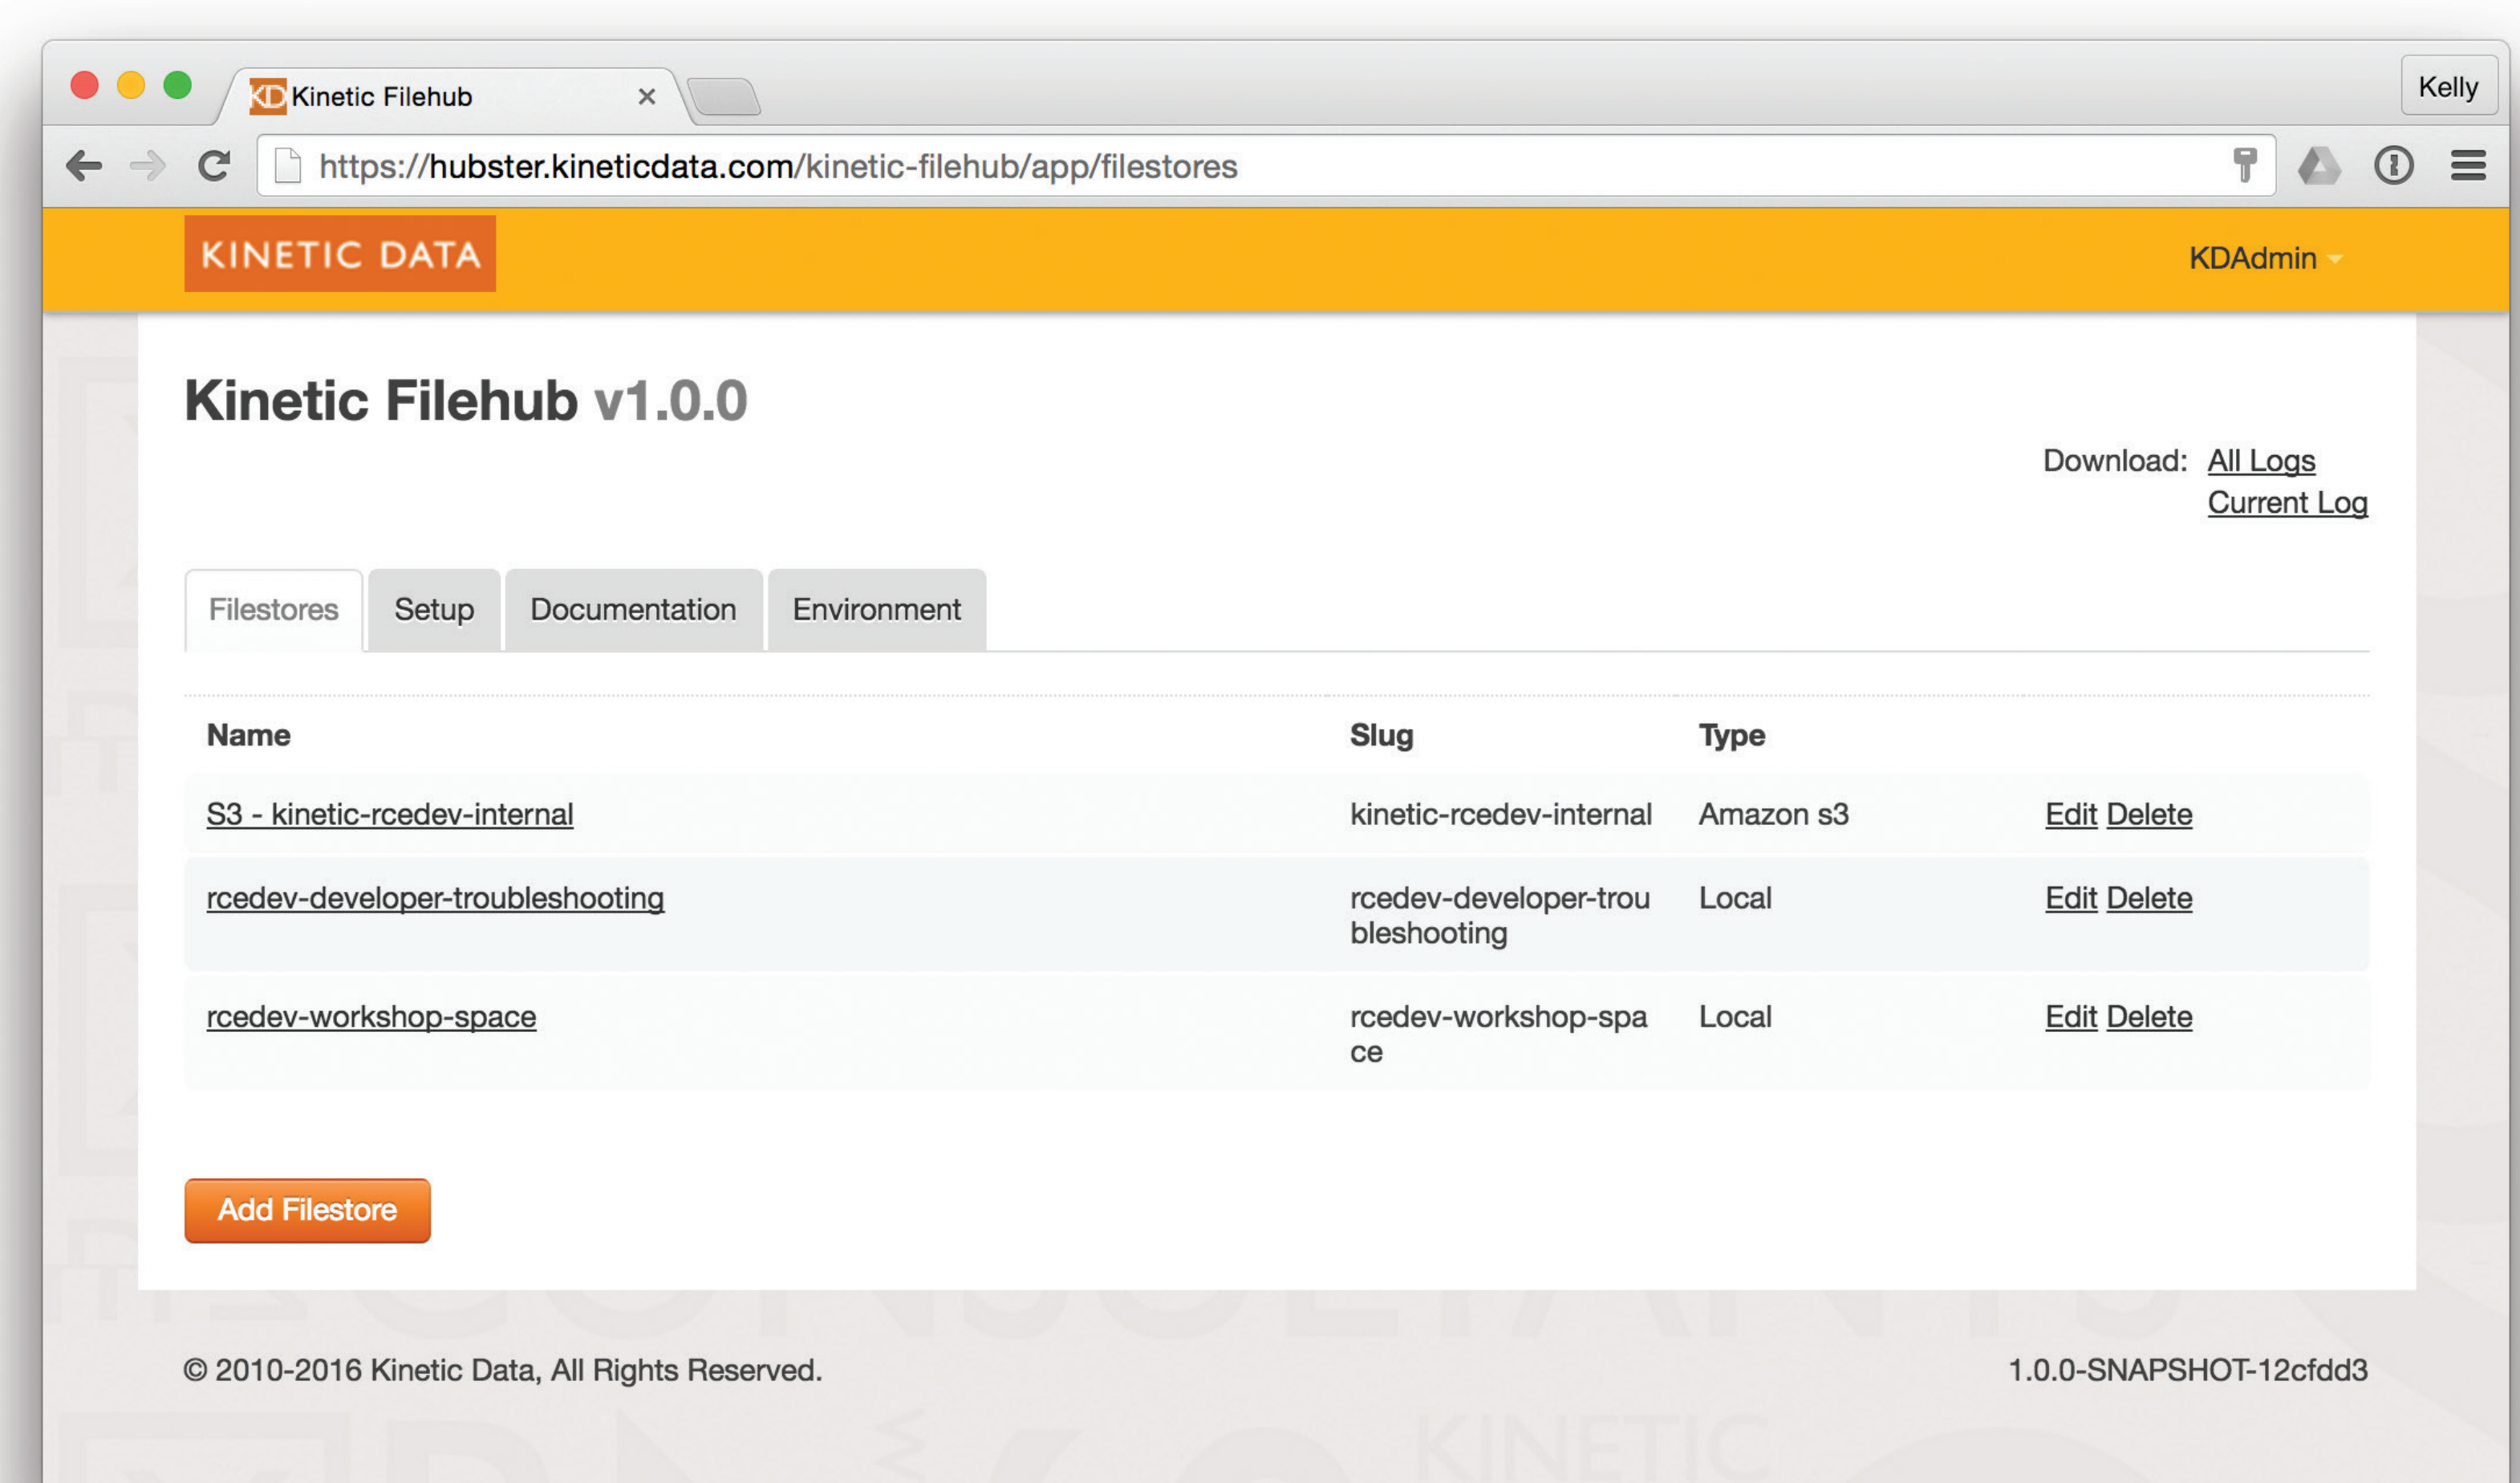

FileHub:

Problem

Different organizations have different storage and security mechanisms for attachments.

Action

Leverage FileHub to store and access files in an agnostic way, regardless of whether files are stored in the cloud, local file storage or a database.

Result

Documents are easier to retrieve, secure and reference across service processes.
